

Rapide Blanc Complete

“The company’s new plant at Rapide Blanc having a present total capacity of 160,000 h.p. started operating early in 1934. The ultimate total capacity of this plant is 240,000 h.p. and the two additional units can be installed at low cost, when conditions warrant. The total expenditure on this plan, including interest during course of construction, amounts to \$13,599,517.
